

<i>Title:</i>	<i>THE GREEN SCHOOLS</i>
<i>Description of best practice:</i>	<i>This project focuses on students to make a change in their local communities. This project has 3 major components: 1st is the Green Schools, 2nd is a local greenhouse/piece of land close to each school, 3rd Local shop that sells the harvest from the local green house. All students are required to participate in the local green house where they can plant organic fruits and vegetables. Each class / student pays a small fee each year. Money is used to support farmers in their local greenhouse throughout the year. In return, in the case that the crop is successful, students and their families can buy cheap organic food. In case of bad harvest, taxes can support farmers throughout the year.</i>
<i>Promoting actor:</i>	<i>Enterprise</i>
<i>Nature of promoting actor:</i>	<i>Public</i>
<i>Country:</i>	<i>Jordan</i>
<i>Productive sector:</i>	<i>Education</i>
<i>Food chain:</i>	<i>Organic Fruit &amp; Vegetables</i>
<i>Problem to respond:</i>	<i>Social capital</i> <i>Sharing of common good</i> <i>Traditional products</i> <i>Valorisation of territory Innovation</i>
<i>Level 1:</i>	<i>Process innovation</i>
<i>Innovation Level 2:</i>	<i>New organization</i>
<i>Realized innovation:</i>	<i>Green school where students learn how to cultivate and transmit their knowledge to parents.</i>
